

PDF Text Editing Walkthrough

This interactive PDF will show you how to edit text and images

How to Edit PDF Text

There are two ways to edit PDF text content - you can either **double click on the text box** or **click on the edit icon** when the box is actively selected.

What you will see

An example of editable content; this could be text or an image.

Font style will change in edit mode

An example of editable content; this could be text or an image.

To confirm, click outside of the active box

An example of content that has been edited and reverted to the original style once the changes have been confirmed.

Editing text appearance

You can edit the appearance of the text content using the right side panel →

Try it yourself
